

ANZ INVESTMENT FUNDS

HIGH GROWTH FUND

ABOUT THIS FUND

The High Growth Fund invests in growth assets (equities, listed property and listed infrastructure), with a very small exposure to income assets (cash and cash equivalents and fixed interest). The fund may also invest in alternative assets.

YOUR INVESTMENT TEAM

Your money is looked after by a highly experienced investment management team with a focus on long-term performance.

RESPONSIBLE INVESTING

We're strong advocates of responsible investing (also known as sustainable investing). Responsible investing means when we're considering whether to invest in a company, we don't just look at their financial performance. We also look at their environmental, social and governance (ESG) performance, because we believe these factors have a big impact on long-term returns.

MARKET AND FUND REVIEW

Global share markets had a stellar February, with several indices trading to all-time highs, driven in part by the ongoing artificial intelligence (AI) boom, which dragged broader indices higher.

In the US, the S&P 500 rose 4.8%, while the NASDAQ 100 rose 6.2% - both were all time highs. All sectors delivered positive gains, with communication services and energy towards the top, while real estate struggled against the backdrop of higher bond yields.

European share markets also delivered strong gains with the Euro Stoxx 50 rising to a two-decade high, while the FTSE 100 hit an all-time high. Although European economies appear to be slowing, equities were in favour as the prospect of lower interest rates remains, while the energy sector – notably Shell and British Petroleum (BP) – continues to bolster returns.

Despite some record-setting performance globally, Australasian markets struggled in February, with the NZX 50 and the ASX 200 underperforming their global counterparts. In New Zealand, the NZX 50 fell 1.1%, with a handful of companies reporting earnings that missed expectations, while in Australia, the ASX 200 was able to edge out a small gain, rising 0.8% over the month. The comparative underperformance was partly due to weakness in the mining sector, which struggled against the backdrop of falling iron ore prices.

Global bonds were mostly lower for the second straight month as the prospect of early interest rate cuts subsided largely on the back of stronger-than-expected US economic data, while in New Zealand, bonds also ended the month lower, but trimmed some losses later in the month after the Reserve Bank of New Zealand (RBNZ) left interest rates unchanged and delivered a somewhat dovish statement.

The High Growth Fund delivered a strong return thanks largely in part to its significant exposure to global equities, which were the best-performing of the major asset classes over the month.

We maintain our defensive position, holding an underweight to global equities and an overweight to domestic and international fixed interest. Our base case is that US Growth remains positive over the short term, with weaker growth in Europe and New Zealand. Labour market demand continues to soften bringing it more in line with labour supply. Core inflation makes slow progress towards target, with central banks holding rates in restrictive territory. Finally, an extended period of tight monetary policy eventually weighs on growth enough to tip it into negative territory, consistent with a mild recession.
