Exceptions

Santos

Activity exposure: >10% revenue unconventional oil and gas

Reason for exception/holding: One of our external managers, who held Santos, queried how our ESG research provider's data reflected Santos' percentage of revenue derived from unconventional oil and gas. This arose from the research provider's interpretation of the financial statements, where all gas supply to the Liquid Natural Gas (LNG) plant is classified as coming from unconventional sources, with all resulting revenue classified as unconventional gas revenue. Further research by our external manager revealed gas supply to the LNG plant came from conventional sources. After making the relevant adjustments to Santos' data, revenue derived from unconventional oil and gas was calculated to be within our 10% exclusion threshold.
