**What are the risks of investing?**

Risk indicator for the International Share Fund:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at [anz.co.nz/OA-riskprofiletool](http://anz.co.nz/OA-riskprofiletool).

Note that even the lowest category does not mean a risk-free investment, and there may be other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the five years ended 30 June 2023. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the product disclosure statement (PDS) for more information about the risks associated with investing in this fund.

Small differences in fees and charges can have a big impact on your investment over the long term.
