Past performance: Past performance does not indicate future performance. The actual performance any given investor realises will depend on many things, is not guaranteed and may be negative as well as positive.

How performance is calculated: Except for in the annual and quarterly KiwiSaver periodic disclosure statements and the fund updates (in which investment performance is calculated after fees and at a 28% prescribed investor rate), performance is after the annual fund charge, and before tax and membership fees (if applicable). The funds in respect of products mentioned on this website are portfolio investment entities (PIEs). Performance for funds operating before they became PIEs on 1 October 2007 has been recalculated to be on the same (pre-tax) basis. Returns for all periods longer than 1 year are annualised.

Unit prices: Unit prices are calculated in accordance with the relevant governing document. The actual unit price that applies at the time a transaction request is received and accepted may differ from the unit prices shown.
