ANZ extends mobile banking offering with new FastPay app

ANZ has added to its credentials as a leader in mobile banking, with the launch of a new app enabling merchants to process EFTPOS payments using both iPhone and Android smartphones.

ANZ FastPay has already enabled thousands of small businesses to take Visa and MasterCard credit and debit card payments anytime, anywhere using their smartphones. This capability has now been extended to EFTPOS transactions via a new, updated ANZ FastPay app. A new card reader is also being introduced meaning the merchant can swipe or insert their customers' cards to process transactions even faster.

The upgrade to ANZ's FastPay app comes after ANZ last year became the first New Zealand bank with mobile solutions for all types of customers, from individuals and small businesses to large institutional clients.

ANZ's Managing Director, Retail and Business Banking, Fred Ohlsson, said the FastPay improvements are the result of feedback from customers on how the app could be made even better.

"ANZ FastPay has proven a highly popular solution for a wide range of businesses that operate on the go, from gardeners and plumbers to personal trainers. It makes payments quicker and easier so they can spend their time making money, not chasing payments.

"Our new app means entering payments is now even easier and faster, further boosting businesses' ability to manage their all-important cash flow. This innovation is another example of how we're listening to customers and delivering solutions that meet their changing needs."

ANZ FastPay

- Free app to download for iPhones and Android smartphones
- Accepts Visa and MasterCard credit and debit card payments – and now also EFTPOS payments
- Emails receipts directly to customers
- Enables multiple users to process sales into one ANZ business account
- Merchants can try ANZ FastPay for any period without locking into long-term contracts*

The update to ANZ FastPay follows a number of other successful ANZ mobile offerings.

In April 2011 the **ANZ goMoney** mobile banking app was launched for retail and small business customers in New Zealand and within hours became the No 1 most popular finance app on iTunes in New Zealand. ANZ continues to update goMoney regularly with new, market leading features

ANZ will shortly release a mobile wallet within ANZ goMoney. The **goMoney Wallet** will enable customers to make contactless payments at Point of Sale with just one tap of their Android smart phones.

Last year ANZ launched **ANZ Direct Mobile**, a tailored banking solution for medium sized or more complex businesses, making it the first New Zealand bank with mobile solutions for all customers.

ANZ also offers **ANZ Transactive Mobile**, a solution enabling institutional, and larger clients to remotely monitor real-time balances on their New Zealand and Australian accounts, view transactions, approve and release payments and obtain live FX rates.

ANZ FastPay is only available to approved merchants who meet ANZ's credit approval criteria and have an ANZ Business Account. Terms, conditions and fees apply. Use of ANZ FastPay requires a cellular or wireless internet connection.
