Growth Fund

Fund description

The Growth Fund invests mainly in growth assets (equities and listed property), with a smaller exposure to income assets (cash and cash equivalents and fixed interest). The fund may also invest in alternative assets.

Market Review

The Growth Fund holds a broad range of investments, both in New Zealand and overseas. Over the month, the fund returned 2.7%, with the best performance coming from its international equities (share) investments.

International shares, which make up around half of the fund, did well as a result of improving global economic growth, good corporate earnings and news of wide sweeping US tax reforms. The three major US share market indices hit record highs, as did the New Zealand share market.

Australian shares were particularly strong performers. Good company selection meant that the fund's holdings comfortably outperformed the Australian share market, which benefited the fund's performance.

Although they delivered modest gains for investors, international fixed interest (bond) markets were unable to match the strong returns from share markets during the month, so the fund's underweight exposure to international bonds also helped.

Our outlook is unchanged. Bonds may continue to struggle as we expect global interest rates to move higher, and so we hold a modest underweight exposure. While we believe share markets will continue to do well, we hold a neutral weighting, as we recognise they have had a strong run and are looking a bit expensive.
